ABSTRACT

The study of task identification in family and community services presents statistical correlations of task frequencies obtained by questionnaire for the occupations of visiting homemaker or homemaker home/health aide, family planning health aide, counselor on alcoholism, management aide in low-income housing projects, deputy juvenile probation officer aide, and family management service aide. One-way matrices present, for each occupation, tasks arranged vertically in descending order of overall mean frequency of performance. A two-way matrix correlates task information for all six\occupations, with occupations arranged horizontally and 16 tasks arranged vertically in descending order of. commonality of performance as indicated by overall mean frequency scores. [The most frequently performed tasks for each occupation are briefly summarized.] A three-page bibliography is included together with nine appendixes which provide letters of transmittal, the task checklist questionnaire for each occupation, tables showing age and educational level of the respondents for each occupation and showing the rank, mean, range, standard deviation, variance; and mean frequency for each task in each occupation, questionnaire and tabulated results from a thesis, descriptors used in an ERIC search, alternate job titles, a list of resource persons, an Iowa congressional map, and additional task lists. (MS)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS).

In a production of the quality of the original document. Reproductions supplied by EDRS are the best that can be made from

FOREWORD

This publication is one of a series of six publications designed to provide data pertaining to the performance of tasks in specific gainful occupations related to home economics. These data may be used in developing appropriate objectives and curricular content for the preparation of individuals to enter the specific occupations studied.

The six subject areas of home economics for related occupations investigated are a modification of the consumer homemaking cluster, which is one of the fifteen United States Office of Education clusters. They include institutional and household maintenance services, child care and development, housing and interior design, food service, family and community services, and clothing and apparel services.

Each of the six publications provides for its respective field a listing of major job categories within the field and the functions and tasks required for the job arranged according to clusters of similar tasks.

These publications are available from the State Director, Career Education Division, Department of Public Instruction, Grimes State Office Building, Des Moines, Iowa, 50319.

IDENTIFICATION OF TASKS FOR

FAMILY AND COMMUNITY SERVICE OCCUPATIONS

AWOI; MI

INTRODÚCTION

There is a need to increase the occupational offerings for students in all areas of work and particularly in the area of Family and Community Services at the secondary and postsecondary level. With job opportunities growing in this area, the challenge is presented to educational institutions and social service agencies to train the persons needed to meet the increased demand for qualified people in the Family and Community Service area.

At the present time there are no clear guides available to local curriculum developers who may wish to expand career education in the area of Family and Community Services. Therefore, a general guide, which may be adapted to local conditions and needs, is necessary to provide direction for curriculum development. More specifically, the tasks associated with each Family and Community Service occupation need to be identified so as to provide a base for curriculum development.

PURPOSE AND OBJECTIVES OF THE STUDY

The purpose of the study was to identify and validate those tasks performed by paraprofessionals in the Family and Community 'Service or pations in Iowa and to determine frequency of task performance. In order to meet the main intent of this research project,

objectives were stated and divided into two phases.

The objectives for each phase were:

Phase I

- 1. to determine, from available literature, a tentative list of occupations in Family and Community Services, which requires less than baccalaureate preparation.
- 2. to develop, from available literature, a tentative list of tasks needed for each occupation listed in objective one.

Phase II

- 3. to identify, by surveying and interviewing employers, supervisors and employees tasks needed for Family, and Community Service jobs available in Iowa as listed in
- 4. to develop a questionnaire to determine relative frequency of performed tasks identified for each occupation.
- 5. to develop a job/task matrix for use by teachers in curriculum development in Family and Community Service occupations in lowa requiring less than baccalaureate preparation.

DEFINITION OF TERMS

Throughout this study, the following terms are used as

defined:.

1. Family and Community Services are those services which assist the family with its responsibilities.

able actions which contribute to a job objective.

- Visiting Homemaker (Homemaker Health Aide assists the mother or wife in performing the duties of the home in order to keep family life as normal as possible when the family is overburdened by illness or by the stress of a family emergency.
- 5. Family Planning Health Aide works under supervision of a Public Health Nurse and is trained by a Public Health Nurse in the areas of family planning, contraception, interviewing skills, patient advocacy; patient recruitment and follow-up, and community education and group presentation.
- 6. <u>Counselors on Alcoholism</u> counsel families and individuals

 // with alcohol related problems.
- Management Aide in Low-Income Housing Project assists
 housing managers of local housing authorities in the
 functioning and office duties of the low-rent housing
 complex.
- 8. Deputy Juvenile Probation Officer Aide does work similar to that of a Deputy Probation Officer with the exception of having a smaller case load and being subject to supervision by Deputy and/or Chief Probation Officer.
- 9. Family Management Service manages financial affairs of families in debt.

with personal, social or business matters and securing assistance in case of emergency.

-meeting his own psychological or physical/needs; helping

ll. Homemaker Assistant, under the direction of a homemaker, carries on the various responsibilities required for maintaining family life in a pleasant clean, orderly home.

REVIEW OF BACKGROUND LITERATURE

Family and Community Service personnel have frequently been identified as one group of auxiliary workers. Bernice Mallory stated that auxiliary personnel are needed due to the expansion in social welfare programs and because there is a shortage of personnel who could carry out the responsibilities. Mallory believed the "work that auxiliary workers do consists of (1) jobs which were formerly done by professionals but for which full professional training is not required or (2) new jobs that expand professional service."

A prediction for the need of auxiliary personnel in the areas of social welfare and international service was made by E. J. Magrath. He thought auxiliary personnel could: (1) help serve professionals; (2) provide jobs for the unemployed and the underemployed; (3) provide needed services not possible with existing manpower; (4) meet

Bernice Mallory, "Auxiliary Workers: Key to Enlarging Our Potential," Journal of Home Economics, 60: 6 3-8, October 1968. p. 623.

expanding needs for services; (5) perform tasks sometimes as well or better than professionals, and (6) offer a cost benefit both from the standpoint of cost of service and cost of training. The Chicago Bureau of Pesearch in the U.S. Office of Education defined subprofessional or auxiliary roles in various social areas and have planned ourriculum and training programs for auxiliary workers.

Axiliary workers can be successfully employed in home economics related areas. 'rs. Clio S. Peinwald, chairman of the Workshop In Utilization and Training of Auxiliary Personnel in Home Economics in June, 1970 said, "Home Economics as a field of endeavor devoted to the concept of service to, and welfare of human beings, needs to remain flexible and experimental in its orientation and approach in order to provide a bridge between the knowledge of the profession and the application of this knowledge to the family. The efficient use of auxiliary personnel in the field will be a step in this direction."

A study by Smith stressed the need for home economics education concerned with social affairs and change.

The occupations related to home economics which could utilize auxiliary personnel were discussed in studies by O'Donnell and Lynton.

³ Toid.

Trene Beavers, "An Overview," Journal of Home Economics, 62:2 pg. 83, February 1970.

A Study of Federal Legislation Relevant to Home Economics Education, Smith Doctoral Interlibrary Loan, Home Economics Abstracts, 1970.

O'Donnell suggested in her study that occupations related to health care of the family, the child, and the elderly should be included in home economics curriculum for the following reasons: (1) Home economists and reaction panels indicated that these occupations were "home-economics related." (2) The importance of these occupations to individuals and families is increasing. However, there is a serious shortage of trained personnel at all educational levels.

(3) Home economists seem to have deep commitments to support educational programs for these occupations.

Jobs that could be created were identified during the Workshop of the National Committee on Employment of Youth, 1967. The was suggested that subprofessionals could assist with the following areas:

- 1. Housing
- 2. Food and Nutrition
- 3. Management
 - 4. Consumer Education
 - 5. Child-parent Education
 - 6. Family Planning Education
 - 7: Legal Referrals
 - 8. Employment Services
 - 9. Social Services

University, Educational Publication Services, January, 1967.

TEdith F. Lynton, The Subprofessional - From Concept to Careers. New York: National Committee on Employment of Youth, 1967.

PHASE I PROCEDURES AND RESULTS

Phase I of the study included the development of:

- a) a tentative list of occupations in Family and Community Services, and
- b) a tentative list of tasks needed for each occupation.

The identification of a tentative list of occupations for Family and Community Service occupations resulted from an ERIC search.

(See Appendix E, page 129 for descriptors used).

A tentative list of Family and Community Service occupations was compiled by consulting various reference sources which included occupation training manuals, telephone directories, resource persons (Appendix G), directors and employees of each occupation. 8-12

⁸U. S. Department of Health, Education, and Welfare, Office of Education, <u>Companion to the Elderly</u>, Publication No. 0E-87006, Washington: U. S. Government Printing Office, 1964.

⁹U. S. Department of Health, Education, and Welfare, Office of Education, <u>The Visiting Homemaker</u>, Publication No. 0E-87002, Washington: U. S. Government Pfinting Office, 1964.

U. S. Department of Health, Education, and Welfare, Office of Education, The Homemaker's Assistant, Publication No. 0E-87008, Washington: U. S. Gøvernment Printing Office, 1964.

U. S. Department of Health, Education, and Welfare, Office of Education, Management Aide in Low-Rent Public Housing Projects, Publication No. OE-87001, Washington: U. S. Government Printing Office, 1964.

U. S. Department of Health, Education, and Welfare, Office of Education, Homemaker-Home Health Aides, Washington: U. S. Government Printing Office, 1967.

精

The tentative occupational list included: Visiting Homemaker, Companion to the Elderly, Homemaker's Assistant, Management Aide in Low-Income Housing Project, Extension Homemaker/Health Aide, Family Planning Health Aide, Counselors on Alcoholism, Deputy Povenile Probation Officer Aide, and Family Management Service.

The reference sources used in compiling a tentative task list were essentially the same as those used for the tentative list of occupations. Additional references were: (1) studies by Shipley and Puehr , used as a basis for the Visiting Homemaker task list and (2) an Extension Service publication for training Extension Aides. 15

Ruth Smith's master thesis was used in this study to incorporate information pertaining to tasks performed by Expanded Nutrition Aides. 16 (See Appendix D , page 114.)

¹³Anna Frances Shipley, "Analysis of Tasks in Three Home Related Occupations," unpublished thesis, Master of Science, Iowa State University, Ames, Iowa, 1967.

Evelyn Burky Ruehr, "Recommended Homemaker/Home Health Aide Competencies: Food Production and Child Care," unpublished thesis, Master of Science, Iowa State University, Ames, Iowa, 1969.

¹⁵U. S. Department of Agriculture, Extension Service, Food and Nutrition - Basic Lessons for Training Extension Aides, Washington: U. S. Government Printing Office, 1971.

¹⁶Ruth Smith, "Tasks Performed by Iowa Extension Family Food Aides," unpublished thesis, Master of Science, Iowa State University, Ames, Iowa, 1972.

Task lists and question maires were developed for the occupations of Companion to the Elderly and Assistant Homemaker. These occupations were omitted from the study because the population could not be identified. (See Appendix G, page 134, for list of reference people contacted in effort to identify the population and Appendix B page 72, for copy of the question maire developed for each).

PHASE II PROCEDURES AND RESULTS

Population and Sample

The population for this study included those paraprofessionals employed in Iowa Family and Community Service occupations as:

- 1. Visiting Homemaker or Homemaker Home/Health Aide
- 2. Family Planning Health Aide
- 3. Counselors on Alcoholism
- 4. Management Aide in Low-Incone Housing Project
- 5. Deputy Juvenile Probation Officer Aide
- 6. Family Management Service

In addition to the Management Aides in Low-Income Housing Projects in Iowa, the population included the Management Aides in Low-Income Housing Projects of the St. Louis (Misturi) Housing Authority.

The sampling procedure for each of the six occupations studied was as follows:

- 1. Wisiting Homemaker or Homemaker Home/Health Aide The Visiting Homemakers were selected by using a
 stratified random sampling accomplished by randomly
 selecting one-third of the Visiting Homemakers in each
 of Iowa's six congressional districts. (See Appendix H
 page 138). A sample size of 217 resulted.
- 2. Family Planning Health Aide The total population of 28 Family Planning Health Aides
 was included in this study.

- Counselors on Alcoholism The sample included the entire population which was 55.
- 4. Management Aide in Low-Income Housing Project The sample included the entire population in Iowa which
 was six plus the total population of the St. Louis
 (Missouri) Housing Authority which was ten, resulting
 in a sample size of 16.
- 5. Deputy Juvenile Probation Officer Aide
 The sample included the entire population which was one.
- 6. Family Management Service
 The sample included the entire population which was three.

Homemakers in Iowa were obtained from Mrs. Dorothy Hagaback, Director, Visiting Homemakers, Black Hawk County; Waterloo, Iowa. The names and addresses of Family Planning Health Aide directors were obtained from Mr. Juris Ponicus, Family Planning Specialist, Iowa State Department of Health, Lucas State Office Building, Des Moines, Iowa. Names and addresses for directors of Alcoholism Counselors were obtained from Mr. Floyd Gardner, 1972 director of North East Council on Alcoholism, Marsh Place Building, Waterloo, Iowa. The names and addresses of Management Aides in Low-Income Housing Projects were obtained from HUD, Federal Building, 911 Walnut Street, Kansas City, Missouri. A cover letter, Appendix A, page 47, and a form sheet, Appendix A, page 48, were mailed to the directors asking for the number employed and their names and addresses.

Development of the Questionnaire

A tentative questionnaire was devised for each of the six

Family and Community Service occupations. Each questionnaire consisted of a task list, a five point frequency rating scale, and space for listing additional tasks performed. An information sheet with instructions accompanied each questionnaire.

The six questionnaires were pretested with a pilot group.

that consisted of four employees in each occupation to determine the clarity and completeness of both the task checklist and information sheet. The pilot group was also asked to list additional tasks performed. (See Appendix A , page 46 , for copy of the checklist).

An interview was also held with a director of each occupational group. After completion of the validation processes explained above, the original task lists were revised to include changes in phraseology and to include additional tasks performed. The questionnaire printed in final form provided space for the respondent to list additional tasks performed with frequency of performance. (See Appendix B, pages 54-76.)

Collection of Data

To determine relative frequency of performed tasks identified for each occupation, the questionnaire was mailed to 217 Visiting Home-makers on March 12, 1973; to 28 Family Planning Health Aides on March 9, 1973; to 55 Alcoholism Counselors on March 12, 1973; to 16 Management Aides in Low-Income Housing Projects on March 9, 1973; to three Family Management Service Aides on February 20, 1973; and to one Deputy Juvenile Probation Officer Aide on February 20, 1973.

A follow-up letter was mailed to the non-respondents after three weeks. A second follow-up letter plus a duplicate questionnaire was mailed to those who had not responded by the end of the fourth week.

(See Appendix A, pages 49 - 51, for copies of these letters and Appendix A, page 52, for percent of respondents on each mailing.)

The number and percentage of questionnaires returned and usable is shown for each occupation in Table I.

ANALYSIS OF DATA AND RESULTS

Data was collected to determine relative frequency of performed tasks identified for occupations in Family and Community

Services, and to develop a task matrix to be used by local teachers in curriculum development.

The respondents for each occupation are described in Tables X and XI, in regard to age and highest level of education completed.

(See Appendix C, pages 77 - 78.)

Indicators of central tendency and variance are given for operational tasks performed by respondents in each of the six Family, and Community Service occupations to provide teachers with a quick reference to tasks necessary for performing various operations or duties within each occupation. (See Tables XII, XIII, XIV, XV, XVI, and XVII, pages 80 - 95.)

Tasks performed for a given occupation have been ranked in descending order according to mean frequency. A mean frequency of four indicates that the task was performed daily, three indicates the task was performed once a week, two indicates the task was performed once a month, one indicates the task was done once a year, and zero indicates the task was never performed. (See Tables XVIII, XIX, XX, XXII, and XXIII, pages 96 - 113.)

In Tables II, III, IV, V, VI, and VII, the mean frequency scores for each task listed were examined to determine what general kinds of tasks were performed most frequently and those performed least frequently. Task item scores with a mean frequency of 3.0

or higher were considered frequently performed and those items with a mean frequency score of 1.0 or less were considered to be performed infrequently. For ease in reading the tables, a mean frequency of 3.00 - 4.00 was designated as an A which meant the task was performed several times a week; a mean frequency of 2.00 - 2.99 was listed as a B which meant the task is performed several times a month; a mean frequency of 1.00 - 1.99 was designated as a C which meant the task was performed several times a year; a mean frequency of 01 - .99 was listed as a D which meant the task was performed less than once a year; and a - meant the task was never done.

The tables on the following pages indicate the frequency of tasks performed by each occupation arranged in descending order within a task. Each table is preceded by a summary paragraph.

The most frequently performed tasks by the Visiting Homemakers were those related to meal preparation and kitchen clean up
(Table II, items 2, 3, 4, 7, 8, 9, 10, 12, 13, 15, 16 and 24).

The number of tasks was 12 out of 29 or 41.4 percent of those considered to be most frequently performed. The largest group of related
tasks performed, infrequently pertained to attending school functions
and transporting children to school. The number of tasks was three
out of seven or 42.9 percent of those considered to be infrequently
performed.

Eight out of the 12 or 66.7 percent of the most frequently performed tasks by Family Planning Health Aides were related to counseling and relationships (Table III, items 12, 27, 29, 31, 35, 41, 43, and 45). Those tasks performed less frequently, seven out of ten or 70 percent, were related to housekeeping chores of the clinic and laboratory.

^aAn A indicates a task which is performed several times a week; B a task which is performed several times a month; C a task which is performed several times a year; D a task which is performed less than once a year; - and a task which is never done.

The mean frequency for similar tasks which were stated on the six questionnaires is reported on a two way matrix table as shown on page 35. Mean frequencies were calculated for each task and arranged in descending order according to the number of occupations performing a similar task. For ease in reading table VIII, letters A, B, C, or D were used. Also a dot (.) was used in this table to indicate a task not asked of respondents representing a particular occupation.

The tasks which were performed by most Family and Community

Service occupations were making referrals to other agencies and providing counseling services. Varying kinds of clerical work were

performed by all occupations. It is assumed that the task of answering the telephone may be performed by employees of each occupation,
but this task was not asked of all six occupations.

SUMMARY AND CONCLUSIONS

Because job opportunities are growing in the area of Family and Community Service occupations, there is a need to train persons for these occupational offerings at the secondary and postsecondary levels. This study surveyed employees of six Family and Community Service occupations to identify the tasks performed and the frequency of task performance.

A summary of the most frequently performed task clusters for each occupation follows:

- 1. Visiting Homemaker's most frequently performed tasks were related to meal preparation.
- Counselors on Alcoholism performed tasks related to clerical duties most often.
- 3. Family Planning Health Aides most frequently performed tasks related to counseling and relationships.
- 4. Low-Rent Housing Management Aides were most frequently involved with tenant relations and interviews.
- 5. It was not possible to cluster the tasks performed most by Deputy Juvenile Probation Aides and by Family Management workers. Most tasks listed on the questionnaires for these occupations were performed frequently.
- 6. Tasks related to making agency referrals and providing counseling services were performed by most Family and Community Service occupations, as shown in the two way matrix table.

The findings of this study may be used by vocational home economics teachers in planning and developing curricula for Family and Community Service occupational training. It is suggested that vocational teachers and administrators work with an advisory council to determine how this study can best be put to use.

I need your help in doing research for the State Department of Public Instruction. This research will result in a task/job matrix which will be used in planning school courses.

A questionnaire has been developed to find out what tasks are performed by ______ . We are interested in tasks performed by an experienced worker.

Will you please help me by reviewing the enclosed Questionnaire and suggest changes on the Guide Sheet. Please return, in the enclosed stamped, self-addressed envelope, both the Questionnaire and the Guide Sheet by February 5, 1973.

Thank you for your cooperation.

Sincerely;

Barbasa Parish

I am presently doing research for the State Department of Public Instruction on the subject of "Identification of Tasks Performed by Paraprofessionals in Family and Community Services." This research will result in a job/task matrix which will be used in the development of school curricula.

In order to survey a sample of the Homemaker-Health Aides in Iowa, it is necessary for me to write to you to obtain the number and names of the Homemaker-Health Aides employed by your agency.

Your cooperation in filling out the enclosed questionnaire and returning it to me at your earliest convenience will be greatly appreciated. Thank you.

Sincerely,

Barbara Pariosh!

UNIVERSITY OF NORTHERN IOWA · Cedar Falls, Iowa 50613

Department of Home Economics
Area 319 273-2814 ____

The Home Economics Department at University of Northern Iowa in cooperation with the Iowa Department of Public Instruction is conducting a state-wide study to determine the tasks performed by workers in various Family and Community Service related occupations.

In the last few years there has been an increased interest throughout the state in vocational education at the high school and postsecondary levels and for this reason the study has been undertaken.
The information will be most helpful for educators who teach persons
interested in employment in these occupations. Your coeperation in
this study would be appreciated and we hope that you will take a
little of your time to help us get the needed information.

We are enclosing a questionnaire and would like you to complete it at your earliest convenience. After the questionnaire is completed, please return it in the enclosed stamped, self-addressed envelope. If you have any questions, please call collect, 319-273-6268.

Only with your kind cooperation can we complete the study, and it will take less than thirty minutes for the employee to complete the questionnaire.

If you would be interested in receiving a summary of the results of the study, please let us know this also. It will be available in July

Sincerely,

, Barbara Parrish

Three weeks ago you received a questionnaire asking you to identify tasks performed in your occupation. As of yet we have not received your response.

We know how easy it is to overlook something with today's busy schedules. Would you please take a few minutes during the next two or three days to respond to the questionnaire and return it to me. Your response will be most appreciated.

If by chance, you no longer have the questionnaire, please drop a card to us and we will be happy to send you one.

Dear Survey Respondent:

I am enclosing a duplicate of the questionnaire which was sent to you a few weeks ago. Without your assistance in completing the enclosed questionnaire, our study will be of little value.

The purpose of this study is to find out what tasks you need to perform and how often. This information will then be made available to persons who do training for the various jobs. Your answers will not be evaluated or reported in anyway. The responses will be tabulated as a group and in no way will names be associated with answers.

Your cooperation in filling out the questionnaire will be greatly appreciated. Thank you for your assistance.

Sincerely,

Barbara Parish

ERIC

Full Text Provided by ERIC

TASKS PERFORMED BY FOOD AIDES *

This questionnaire is in the form of a check list. The list includes many tasks that may be a part of your job in the adult phase of the. Expanded Nutrition Program. You may never do some of these tasks. You may do a number of tasks sometimes, while you may do some tasks all the time.

Check column <u>l</u> if you'do not do this in your job.

Check column 2 if you sometimes do the task in your job.

Check column 3 if you almost always do the task.

There is space at the end of the list for you to tell us about any task you do that we have omitted. Please write it down. Then check to see that you have responded to each task. They are listed on both sides of the sheet.

		I never do this task	I sometimes do this task	I always do this task
		1	, <u>5</u>	3
Code	<u>Tasks</u>			
() 1.	Attends weekly training meetings			`
()	Avocado weekly ordining meetings			
() 2.	Confers with Extension Home Economics Supervisor at staff meetings and as need arises	; ;		,
() 3.	Plans work for week ahead			
() 4.	Locates families to be contacted about the program		·	
() 5.	Evaluates family progress with aid of supervisor	`.		
() 6.	Prepares weekly aide report and time voucher			
() 7.	Listens to family problems regardless of nature	_

Column #1 represents the item mean score on a 1 to 3 point scale. Column #2 represents the item mean score on a 1 to 5 point scale. A normalizing theory was used in transferring a 3 point scale to a 5 point scale. The formula used was:

3 point value : by 3 x 5 = 5 point value

The mean scores on a 0 to 4 point scale were computed by subtracting

1.00 from the mean scores of 1 to 5 point scale. All numbers were
rounded to nearest hundredth.
